

KENT-ONE BLOCK MACHINE

The **KENT-ONE** Block Machine is a low cost - high production machine that can make standard block, brick and all of those expensive specials for a lot less.

The **KENT-ONE** is a semi-automatic block machine. It is an air operated machine with dual motor vibration consisting of twin 3hp motors with electronic braking. The vibration method is identical with the larger *Besser* machines and the machine is controlled by a PLC (Programmable Logic Controller).

Positive sizing is easily interchanged for special shapes and sizes. Rapid economical production makes this an ideal additional unit for smaller plants.

Dimensions: Length	1905mm { 6' 3" }
Width	1830mm { 6' 0" }
Height	2750mm { 9' 0" }
